2010

Season: AUTUMN 2010

Is there a formula that can change people's destinies? There is an extremely powerful force that can change our perception of the universe and our own lives. Until now no one has been able to explain it. Albert Einstein worked it out in his time using a mathematical equation, but for some unknown reason, he decided it must be kept hidden. Javier, a screenwriter for the radio, a loser and a bit of a bastard, and Sarah, a mysterious and seductive specialist in the German genius, will undergo a search full of dangers and surprises that will take them to the places where the most famous Nobel Prize winner of all time lived, worked, suffered and loved. What they don't know is that their adventure in search of the final answer will be first and foremost an illuminating journey into the most profound part of their beings.

Publishing rights available from **Company:** International Editors' Co.

Address: Provenza, 276, 1r / 08008 Barcelona (Spain)
