AUTUMN

2010

Season: AUTUMN 2010

This book shows how to make all sorts of professional mock-ups to precise scale for presenting construction projects in architecture, engineering, museum exhibits and temporary commercial installations. A profusely illustrated book that introduces materials, tools and techniques and offers practical, step-by-step guides on making different types of mock-ups. It describes all the materials and their advantages and disadvantages for different types of jobs, and also presents the tools needed to work with them. It shows the main techniques, with a wide range of possibilities, and describes several tricks and resources with which to create different elements such as vegetation, furniture, etc., always to scale. This title also includes five complete, step-by-step descriptions of how to make various types of mock-ups using different techniques.
